## Brainware announces SAP-certified workflow module for accounts payable management

December 3, 2007, Ashburn, VA — **Brainware, Inc.**, the leading provider of intelligent data capture and enterprise search solutions, today released its new workflow module for Accounts Payable management, **A/P-WebDesk™**. Also, the company has announced that the product, designed to provide users with a fully SAP-compatible, easy-to-use interface to manage the entire invoice processing lifecycle, has been certified for integration with **SAP R/3 ECC**.

“The latest addition to our product family allows organizations to improve their bottom line by significantly reducing the cost and time of invoice processing,” says Carl Mergele, Brainware CEO.

“Missed deadlines, misunderstood responsibilities, human errors – these are the challenges we designed A/P-WebDesk to address. Also, the product helps companies confidently handle compliance and audit issues, because it provides an unprecedented level of transparency.”

A/P-WebDesk operates as a fully integrated extension of SAP, through either a thick or thin (i.e., Web-based, NetWeaver-compliant) client interface. It reflects the SAP “look and feel” and requires no modification for use in SAP environments. The product enables SAP-based user roles to ensure proper levels of authorization, task delegation and client assignments.

Other key features of A/P-WebDesk include:

- KPI reporting—users can set threshold alerts for key performance indicators (KPIs), enabling health checks of invoice processing throughput “at a glance”
- Deadline monitoring & notifications—users can set deadline thresholds and prescribe necessary actions for overdue invoices, such as email reminders and adjustment of authorization levels
- Accelerated input and processing—users can perform common functions on multiple invoices awaiting processing

A/P-WebDesk was created as a workflow extension for **A/P-distiller™**, Brainware's intelligent data capture and document processing solution, used by Global 2000 companies to automate invoice processing. Built from ground up to handle unstructured data, the template-free, document-agnostic solution routinely enables 80% to 90% field extraction rates and 60% to 80% reductions in manual data entry.

For more information on A/P-WebDesk, please visit our website: [www.brainware.com](http://www.brainware.com).

**About Brainware:** Brainware, Inc. is the leading provider of intelligent data capture and enterprise search solutions that help Global 2000 companies eliminate costly manual data entry, rapidly process large volumes of documents and retrieve data from across the enterprise. Its solutions were built from the ground up to manage unstructured data without templates, exact definitions, taxonomies or indexing. Headquartered in Ashburn, Virginia, Brainware maintains global sales and support operations through its North American, U.K. and European offices. Brainware customers include Airbus, Alcon, Alltel, Amgen, Anadarko, BB&T, British American Tobacco, ConocoPhillips, Halliburton, Her Majesty's Prison Service, JohnsonDiversey, Kimberly-Clark, KPMG, Mellon Bank/SourceNet, NHS/Xansa, Nestle, Pactiv, Reynolds & Reynolds, Shell, Southern Company, and many others.
