## **AmCad to resell Brainware's IDC-distiller to state & local governments for automatic document processing**

***Brainware solution to speed processing of land management, legal, vital records and other document types***

August 13, 2007, Ashburn, Virginia USA -- **Brainware, Inc.** whose solutions enable high-speed capture, search, and processing of vital, unstructured corporate data, has announced that **American Cadastre, LLC (dba AmCad)**, a full-service technology and solutions provider for state and local governments, has become one of its newest channel partners. AmCad will resell Brainware's **IDC-distiller™** solution for high-speed data capture, extraction and document processing to AmCad's extensive roster of state and local government customers.

AmCad will embed IDC-distiller into its automated document processing solutions, helping government agencies to rapidly extract and process critical data from huge archives of land management records, court filings, vital (birth/death) records, probates and wills, and other document types. Data from these millions of document pages can then be easily processed through a variety of back-office enterprise resource planning (ERP) or document management system (DMS) platforms. AmCad plans to integrate IDC-Distiller technology with its Land Records Information System (AiLIS) and Case Management System (AiCMS). Based in Herndon, Virginia, AmCad has been providing document management, automation, and conversion solutions to government clients for over 20 years. The company selected IDC-distiller primarily for its ability to quickly extract and process data without requiring the creation or tailoring of time-consuming templates or forms.

"We evaluated Brainware's IDC-distiller against several leading competitors, and were quickly convinced that Brainware's 'agnostic' ability to process any kind of document was simply unbeatable," says Visagar Shyamsundar, AmCad Chief Technology Officer. "We were particularly impressed by Brainware's ability to rapidly extract data from extremely lengthy, line-item tables—this will generate huge savings by our government clients. We expect that IDC-

distiller will prove to be a decisive advantage in our business development programs, including several large, near-term accounts.”

“With its extensive reach into the state and local government marketplace, AmCad makes an ideal reselling partner for Brainware,” says Carl Mergele, Brainware CEO. “Given the exponential growth in demand for document processing and data extraction solutions by government agencies of all sizes, our partnership with AmCad partnership makes perfect market sense for state and local government customers.”
