## Brainware's IDC-distiller™ Tapped by Apptricity to Power its “Procure-to-Pay” Solution for a Leading Wireless Company

**Dulles, VA and Dallas, TX, September 14, 2006--** Apptricity will use the intelligent classification and extraction capabilities of Brainware's IDC-distiller to enable a leading wireless communications provider to advance the data provisioning capabilities of its Supply Chain Apptricity solutions. Apptricity will offer IDC-distiller as a part of its Procure-to-Pay solution used by the wireless company to automate invoice management.

“We are delighted to support Apptricity in furthering their customers' ERP functions,” says Brainware CEO Carl Mergele. “We have seen IDC-distiller dramatically reduce data entry and processing costs and boost productivity of all kinds of end users, at companies of all sizes. By significantly automating invoice processing, Apptricity customers will have more time to provide services to *their* customers.”

Brainware's IDC-distiller is a breakthrough solution to intelligent data capture (IDC) that reduces processing costs and increases throughput rates by as much as 40% to 80%. Through content-based, “auto learning” techniques, IDC-distiller leapfrogs traditional data capture and forms processing to automatically capture and categorize structured *and* unstructured data, regardless of form or layout. Captured data can be seamlessly integrated with SAP, Oracle, JD Edwards, Apptricity, and other business applications and document management systems (DMS), significantly improving corporate business performance and topline revenue growth.

“We see significant value from incorporating Brainware's fast and accurate intelligent data classification and extraction mechanisms into our supply chain and financial applications,” says Randy Lieberman, Apptricity's Vice President of Corporate Development and Chief Financial Officer. “We first became partners with Brainware in 2005 to extend the data capture, extraction and provisioning alternatives we provide our customers. We are excited to deliver this extended solution to our key customers.”

**About Brainware:** Brainware, Inc. provides cutting-edge software solutions that enable enterprise organizations to significantly improve document-intensive processes and measurably increase workplace productivity. Its patented intelligent software engine, Brainware™, forms the foundation of its powerful intelligent data capture, electronic document management, and desktop and enterprise search and retrieval solutions.
