Brainware's Enterprise Search Tools Win "Trend Setting" and "Readers Choice" Awards

Dulles, VA, September 18, 2006 — In their September 2006 issue, the editors of *KMWorld* magazine recognize Brainware, Inc.'s enterprise search solution, **Globalbrain™**, as a "Trend-Setting Product" for 2006. In the previous issue of the magazine, *KMWorld* readers voted Brainware as a "Top Provider" of enterprise search solutions to the legal market.

Globalbrain is a suite of "intelligent" search tools. Globalbrain uses natural-language, context-based search algorithms to provide fast, structure-free access to vital corporate or organizational information, wherever it's stored and however it's formatted.

- **OutlookAccess™** is integrated directly into Outlook's toolbar, so you can quickly and easily find e-mails, e-mail attachments, calendar items, notes, posted documents, and more.
- **Globalbrain Personal Edition** easily locates information on PCs and mapped network drives. Advanced optical character recognition (OCR) capabilities enable searches of TIFF, JPEG, and PDF image files.
- **Globalbrain Enterprise Edition** provides a single interface to all levels of users, allowing users to quickly locate information across multiple systems, databases, file servers, email systems, legacy systems, and geographic locations.

Brainware's **IDC-distiller™** products bring the same "intelligent" approach to intelligent data capture and automated processing of invoices, accounts payable, customer orders, document indexing, and claims processing, dramatically reducing data entry costs and schedules.

"We are delighted to receive this recognition from the editors and readers of *KMWorld*," says Brainware CEO Carl Mergele. "It's gratifying to see this validation of our strategy to bring best-of-breed technologies for search, retrieval and data capture to the fast-growing market represented by *KMWorld* readers."

"Assembling the list of Trend-Setting Products of 2006 is a year-long collaborative effort with editorial colleagues and analysts and, especially, users," says Hugh McKellar, *KMWorld* editor in chief. "Roughly 1,500 products from some 300 vendors were considered, and the ones listed here demonstrate exquisite execution designed for, and with input from, the most important constituency of them all--their customers."

"We were very impressed by Globalbrain's breadth of technical vision and depth of functionality," McKellar continues. "Given the explosive growth in the enterprise search market space, we believe Globalbrain is well positioned to leverage increased market share through direct sales and a growing number of partners and resellers."

About Brainware: Brainware, Inc. provides Global 2000 corporations and government agencies with fast, structure-free access to critical information locked in the growing avalanche of organizational databases, emails, document archives, images, and file servers. Brainware's IDC-distiller™ products routinely speed processing of invoices, accounts payable, and customer orders by 40% to 80% "right out of the box," and the Globalbrain™ Suite (of OutlookAccess and Globalbrain Personal and Enterprise editions) provides context-based, high-speed search/retrieval of the "right" information from voluminous files and systems. Headquartered in Dulles, Virginia, Brainware maintains operations throughout North America and Europe. Additional information on Brainware, Inc. is available at www.brainware.com.
