Brainware's Swiss affiliate opens new EMEA office in Neuchâtel, Switzerland

Fast-growing provider of document processing solutions continues global expansion

July 25, 2007, Neuchâtel Switzerland — Brainware, Inc. whose solutions enable high-speed capture, search, and processing of vital, unstructured corporate data, today announced the opening of a new office by its Swiss affiliate, BDGB Enterprise Software SÀRL. The Neuchâtel office will oversee the ongoing and rapid growth of the company's European, Middle Eastern, and African (EMEA) operations.

Opening ceremonies were held today at the Beau-Rivage Hotel Neuchâtel. Two weeks prior to the opening, Brainware CEO Carl Mergele announced that Gerard Lopez, a successful European business development executive, will serve as Vice President of EMEA Operations from the Neuchâtel office. Lopez was formerly the Director of the Canton of Neuchâtel Economical Development Agency (DEN). (See separate news release issued on July 9 for more information regarding Mr. Lopez.)

The Neuchâtel office opening continues an ongoing series of global corporate expansions. In February of this year, Brainware announced a quadrupling of its global office space, including the relocation of its worldwide headquarters to Ashburn, Virginia and new offices in High Wycombe, U.K. The company is also rapidly expanding its global sales force to address increased demand for its "intelligent" data capture and document processing solutions among Global 2000 clients.

"Brainware's expansion coincides with ongoing, rapid growth in the worldwide document capture market, which is expected to double in the next three years," Mergele said during the opening reception. "Demand continues to grow for IDC-distiller and related solutions for automatic data capture and processing of all document types, in all languages, and in all applications."

The intelligent, powerful Brainware® engine drives the **IDC-distiller™** suite of solutions to provide automatic, high-speed classification and extraction of critical data from any type of document image and other electronic formats. IDC-distiller then exports that data to corporate ERP

software platforms (SAP, Oracle, Peoplesoft, JD Edwards, etc.) or to document management and archival systems such as Documentum, Filenet, OpenText, and Stellent. The **Globalbrain™** suite (Personal and Enterprise editions and OutlookAccess) provides context-based, high-speed search and retrieval of the “right” information from voluminous files and systems.

The new office is located at Rue de Sainte-Helene 3, 3 Etage West, 2009 Neuchâtel. The office phone number is +41 32 755 73 00 (fax: +41 32 755 73 09). General inquiries can be directed to info@brainware.com.

About Brainware®: Brainware, Inc. provides Global 2000 corporations and government agencies with fast, structure-free and “document agnostic” access to critical information locked in the growing avalanche of organizational databases, emails, document archives, images, and file servers. Headquartered in Ashburn, Virginia, Brainware maintains global sales and support operations through its North American, U.K. and European offices. Brainware customers include Airbus, Alltel Wireless, Anadarko, Bertelsmann, ConocoPhillips, CSC, GlaxoSmithKline, Halliburton, JohnsonDiversey, Kimberly-Clark, KPMG, NHS/Xansa, Nestle, Pitney Bowes, Shell, Siemens, Southern Company, and many others.
