Brainware Distiller Receives Latest Oracle E-Business Suite Certification

June 29, 2009, Ashburn, VA — Brainware, Inc., the leading provider of intelligent data capture and enterprise search solutions, announced today that Brainware Distiller 5, the latest version of its flagship product, has been certified for integration with Oracle E-Business Suite 11i and 12i. Brainware Distiller seamlessly integrates with Oracle, allowing customers to automate data extraction from documents directly into their Oracle enterprise applications.

“Brainware is committed to helping Oracle customers gain additional value from their enterprise resource planning investments,” says Carl Mergele, Brainware CEO. “The latest certification should give the Oracle user-community the comfort of knowing that our solutions have been thoroughly tested by Oracle and work seamlessly with their systems. With our products, customers can accomplish even more in these challenging economic times by providing world class automated data extraction into their Oracle financial systems, eliminating manual data entry, costly errors and uncovering missed early payment discounts.”

Brainware’s Distiller application combines powerful classification, extraction, and search capabilities into a single platform that reads, sorts, extracts and validates business information from virtually any document type, with minimal human intervention. The solution allows organizations to reduce document processing costs by 60-80% or more.

Brainware Distiller benefits include:

- 80-90% field extraction rates right from the start
- Unmatched line-item extraction and line-level matching
- Dashboards and reporting showing real-time KPIs for each step in the process
- Scalability to any volume and any document type
- Web-enabled for browser-based document verification and correction
- Integrated core Oracle Database support
