

BRAINWARE DISTILLER™ VISIBILITY

A web-based dashboard
for business performance.

Gain control by focusing
your attention to
the critical details,
not the noise

Real-time insight and analysis

The key to business performance management is insight – insight into your business processes that empower you to take timely and decisive action. Brainware Visibility is a reporting, dashboard, and analytics package that puts the power of insight at your fingertips. With Brainware Visibility, you have immediate access to the metrics and key performance indicators that let you know where every document in Brainware Distiller is, how the system is performing, and where you need to focus your time and attention.

ACCESS TO CRITICAL INFORMATION

- Management dashboards show the flow for all of your invoices, remittances, orders and other documents
- See how efficiently your processes in Distiller are running
- Know where all of the documents are in the process
- Pinpoint and drill down on any single document

DETAILED STATISTICS ON DISTILLER FUNCTIONS

- Data extraction metrics
- Verifier status updates
- Straight through processing stats
- Document details by amount or date

MANAGEMENT REPORTS

Brainware Visibility comes with pre-built reports and also supports ad hoc report design. The intuitive user interface and interactive drag-n-drop design tool helps managers and decision makers create their own reports instantaneously without any support from IT.

Data is easily selected, filtered, grouped and summarized at runtime. Graphs and charts can be inserted by simply dragging data elements into a report canvas and viewed in PDF, Excel, HTML and CSV formats.

The following standard reports are included in your Brainware Visibility package:

- | **AVERAGE EXTRACTION**
Average field extraction rates for today, yesterday, past 7 days, past 30 days and specified date ranges
- | **CURRENT STATUS**
List of all documents being processed, by event and by project
- | **DOCUMENT THROUGHPUT DETAIL**
Processing time for each document in a given date range, with drill down to extraction results and document image
- | **DOCUMENT THROUGHPUT SUMMARY**
Summary view of document processing time for any given project and date range
- | **EXTRACTION CHART**
Summary view of extraction % for today, yesterday, past 7 days, past 30 days, by project and specified date
- | **EXTRACTION STATISTICS**
Summary processing statistics including number of documents and fields processed, as well as % verified, correct, not on document, and Straight-Through Processing ("STP") for today, yesterday, past 7 days, past 30 days and specified date
- | **FIELD EXTRACTION EXCEPTION REPORT**
List of all documents where extracted value and final were different with ability to drill to document image
- | **FIELD EXTRACTION RESULTS**
Detailed field extraction results for any given document number
- | **SNAPSHOT STATISTICS**
Summary extraction results by document class for a given date range
- | **THROUGHPUT SUMMARY**
Summary of documents imported, waiting in Verifier, exported and voided
- | **VERIFIED BY USER**
Documents verified by specific users for a given project and date range
- | **VERIFIER SUMMARY**
Documents verified by specific users in graphical format

ACCOUNTS PAYABLE REPORTS

The following standard reports are included in your Brainware Visibility package:

- | **DOCUMENT SNAPSHOT**
List of all documents processed in a given date range or by vendor, including import date/time, extract date/time, and link to document image
- | **INVOICE DISCOVERY**
Invoice information including amounts paid by vendor
- | **SNAPSHOT INVOICE REPORT**
Field extraction results for all documents processed in a given date range with threshold alerts to highlight low % extraction performance
- | **VENDOR SNAPSHOT STATISTICS**
List of document classes with statistics that include number of documents, number of fields, % correct and % STP

ALERTS

Report designers and power users can configure alerts on data elements to be triggered when specific thresholds are met or failed to be met. These alerts can be delivered over the web, email, instant messengers, SMS, and other hand-held devices.
