

BRAINWARE DISTILLER™

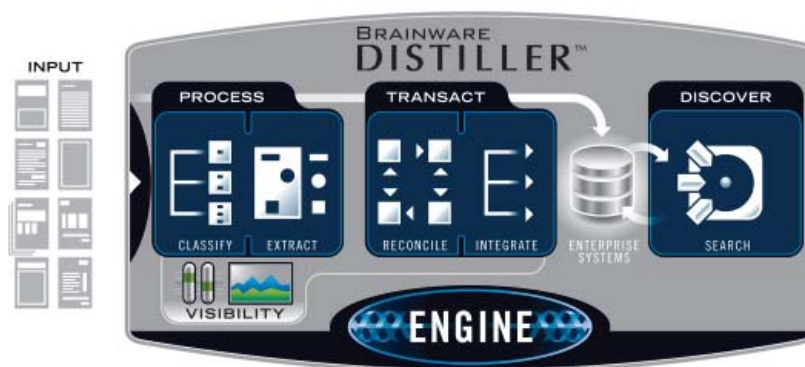

You need critical data from a multitude of document types in order to keep your business running at peak performance. Whether you have orders to fulfill, invoices to pay, remittances to reconcile or a mailroom to automate, Brainware Distiller helps you automatically process these documents – with little or no manual intervention.

Brainware Distiller™
makes you money
by unlocking
information that is
otherwise trapped
in your documents

POWERFUL DOCUMENT PROCESSING PLATFORM

Brainware Distiller is a single solution that can process all types of documents in any language. There is no need to purchase another product or module to process your orders, remittances, invoices, bills of lading, mail, proof-of-delivery statements or any other transactional documents.

Distiller will automatically classify incoming paper or electronic documents, extract any needed data from them (without the use of templates or dictionaries), validate the data against external databases and pass the document image and the validated data on for further processing or archiving – all with little or no manual keying or document separation.

PROCESS

- | Input documents from any source including scan, email, fax and in any format including TIF, PDF, DOC and XLS and many more.
- | Classify documents based on their content to reduce manual sorting at scan.
- | Extract field and line item data at 80-90% accuracy without templates, keywords or scripted rules.

TRANSACTION

- | Reconcile extracted information against known sources to ensure accuracy and validity independent of misspellings and OCR errors.
- | Integrate indexing information and extracted data into existing enterprise application architecture and without disrupting business processes.

DISCOVER

- | Discover new insight into documents using Brainware's full text, fault tolerant search platform.

|||||
MAKE MORE MONEY

Reduce or eliminate the need for manually keying transactional or index data in your operations and pull those dollars directly down to the bottom line.

- | Invoice faster because you are processing orders and bills of lading more quickly
- | Improve customer service by processing orders accurately
- | Quickly, accurately and automatically reconcile remittance statements to reveal further income opportunities
- | Stop paying overtime and audit recovery fees in your AP operations
- | Take more early payment discounts because processing invoices takes 48 hours or less
- | Reconcile procurement contracts and payables spend to quickly ID and control costs
- | Free up data entry personnel to proactively up-sell and cross-sell customers

It's likely you already have some form of automation in place – whether it's EDI, EIPP, imaging and/or workflow. You may even be “paperless” with documents coming in via fax or email. But even if you have automated 80% or more of your transactional documents, what remains can be in the thousands or millions of documents. With Distiller, you can quickly transform your costly, error-prone processes into streamlined, revenue-generating, value-add operations.

|||||
RAPID TIME TO VALUE

Distiller's template-free, human-like learning approach to data capture allows us to get the system up and running in your environment, in as little as 48 hours! Start realizing ROI with page one on day one!

|||||
PROVEN

Some of the largest brands in the world rely on Brainware to automate their transactional data processing: Abbott, Airbus, Alcon, Amgen, Anadarko, Anixter, bioMerieux, British American Tobacco, Continental Airlines, E.ON, Halliburton, Her Majesty's Prison Service, HMSHost, JohnsonDiversey, Kimberly-Clark, KPMG, Logica, NHS Shared Business Services, Northumbrian Water, Nottingham University, Philip Morris International, Q8, Scottish and Southern Energy, Shell, Southern Water, and Sun Chemical to name a few.

|||||
MULTI-LINGUAL

Distiller is language independent, allowing global organisations and multi-national shared service centres to process documents for many countries using a single instance of the solution.

|||||
UNIQUE, FLEXIBLE PRICING OPTIONS

In addition to the standard perpetual software license model, Brainware offers a “per-page” pricing model. This licensing model provides the lowest upfront cash investment and you may treat this type of license as an operational expense, instead of a capital expenditure. “Per-page” licenses charge for each page processed by Distiller and you pay only for the documents that are processed. This licensing model can also be transferred to perpetual licenses in the future.

|||||
LEARNS LIKE YOU DO

Because Distiller learns how to process the same way a human does, it does not require you to configure anchors, templates or keywords for each document type or document layout. With a small sample set, Distiller learns how to tell one document type from another and what to do with each document (extract this data, validate it against this data and export it here). This auto-learning feature drastically reduces your reliance on IT personnel to maintain or update the solution.
