

IDC-distiller™ 508 Compliance Voluntary Product Accessibility

Date: May 26, 2005

Name of Product: IDC-distiller

Contact for more Information: Blake Hayman– Phone: 703-948-5800; E-mail: blake.hayman@brainware.com

IDC-distiller 508 Compliance – Summary Table Voluntary Product Accessibility

<i>Criteria</i>	Supporting Features	Remarks and explanations
Section 1194.21 Software Applications and Operating Systems	See Below	
Section 1194.22 Web-based Internet Information and Applications	Not Applicable	<p>IDC-distiller is not a web based application as per the Section 508 Subpart A reference to World Wide Web Consortium’s definition.</p> <p>IDC-distiller is a stand alone application not accessed through a web browser and is client server World Wide Web Consortium based not web based.</p>

Section 1194.23 Telecommunications Products	Not Applicable	As per the Section 508 Subpart A definition IDC-distiller is not a Telecommunications Product
Section 1194.24 Video and Multi-media Products	Not Applicable	As per the Section 508 Subpart A definition IDC-distiller is not a Video or Multi-media Product
Section 1194.25 Self-Contained, Closed Products	Not Applicable	As per the Section 508 Subpart A definition IDC-distiller is not a Self Contained, Closed Product
Section 1194.26 Desktop and Portable Computers	Not Applicable	As per the Section 508 Subpart A definition IDC-distiller is not a Desktop or Portable Computer
Section 1194.31 Functional Performance Criteria	See Below	
Section 1194.41 Information, Documentation and Support	See Below	

IDC-distiller 508 Compliance – Detail Voluntary Product Accessibility

Section 1194.21 Software Applications and Operating Systems

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supports	All IDC-distiller functions are executable from a keyboard
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supports	IDC-distiller does not disrupt or disable any accessibility features.

<p>(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p>	<p>Supports</p>	<p>IDC-distiller has multiple options for on screen indication of focus.</p>
<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>	<p>Supports</p>	<p>IDC-distiller functionalities are available outside of the products. Data is programmatically exposed through a windows API to identify functions.</p>
<p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p>	<p>Supports</p>	<p>Bitmap icons are consistent in their display and function throughout the products.</p>
<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	<p>Supports</p>	<p>Text is displayed using standard operating systems functions.</p>
<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	<p>Supports through Equivalent Facilitation</p>	<p>Display features are controlled by the system administrator and can be set to be compatible with user selected attributes.</p>
<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>Supports</p>	<p>All animated elements are provided in a non-animated form. Animations are used only to identify progress when the system is performing analytical functions.</p>

<p>(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Supports</p>	<p>Color coding is not the only means of conveying information.</p>
<p>(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.</p>	<p>Supports through Equivalent Facilitation</p>	<p>SER defines a user in this case as someone having administrator level access. The User can make changes to the color schemes for individual verifiers that can then be saved to the desktop.</p>
<p>(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supports</p>	<p>No flashing used.</p>
<p>(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supports</p>	<p>IDC-distiller can be easily integrated with Assistive Technologies.</p>

Section 1194.31 Functional Performance Criteria

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supports when combines with Compatible AT	Text based functionality can be integrated with assistive technology.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supports	IDC-distiller can enlarge all information to a size desired by the user.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supports	IDC-distiller does not have audio components.

<p>(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.</p>	<p>Supports</p>	<p>IDC-distiller does not have audio components.</p>
<p>(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.</p>	<p>Supports</p>	<p>IDC-distiller does not require user speech.</p>
<p>(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p>	<p>Supports when combined with Assistive Technology</p>	<p>IDC-distiller has provided access to features that are accomplished through many different methods.</p>

Section 1194.41 Information, Documentation and Support

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supports	Product support documentation in alternate forms is available upon request by a qualified IDC-distiller license holder.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	End-users have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports	Support is available through a variety of mediums.
